

# SMART CONTROL OF YOUR HOME

IQ@HOME

Out of the box product  
for individual home, apartment or residential area  
with easy installation and zero start-up costs

### Warm wake up

Wake up into a warm house. The system turns on heating at a set time before the smartphone wake-up alarm rings.

### Sunny wake up

Wake up naturally. The system slowly lifts room blinds and let the sunlight enter the bedroom few minutes before wake-up alarm rings.

### Coming home

Let your house show you how happy it is when you return home! As soon as phone connects to home wi-fi network, it turns the heating and lights on.

### Connect charger

Charging your phone beside the bed? Switch the lights off at the evening with just plugging in the phone.

### Random lights

When family is away from home a simple deception with a set light sequence can prevent burglary.

### Smart lights

With evening twilight as the sun falls, the system sets evening scene. Lights turns on and blinds close down.

### Call notification

When selected phone rings, lights blink couple of times, to bring attention to incoming call.

### Eco mode

Manual temperature setpoint adjustment remain valid for one hour, after that it returns to the predefined, more optimal value.

### Lights

On/off and dimmable control with scenes, schedule, PIR, ...

### Blinds

Up/down control with scenes, schedule, weather, ...

### Temperature

Cooling & heating mode, speed limit selection, schedule, ...

### Safety
