

MANAGEMENT WITH SMART SOLUTIONS

MANAGE GENERATION AND USAGE OF GREEN ENERGY BY HIGHLY INTEGRATED SYSTEM

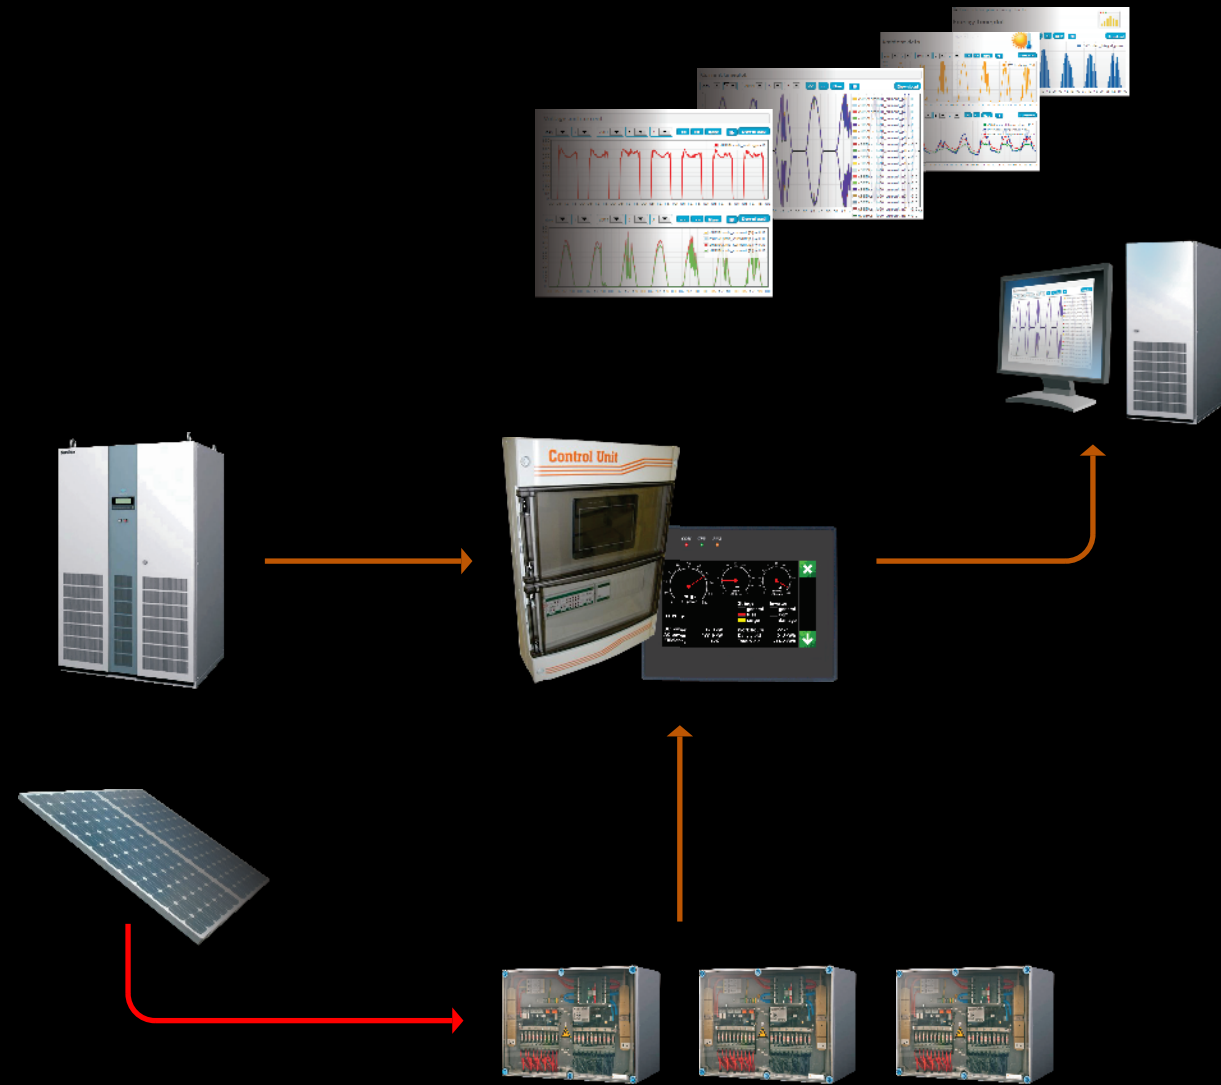

Solar Power Plant Management

Sun IQ @ Home

Integra IQ @ Home

Solar Power Plant Management

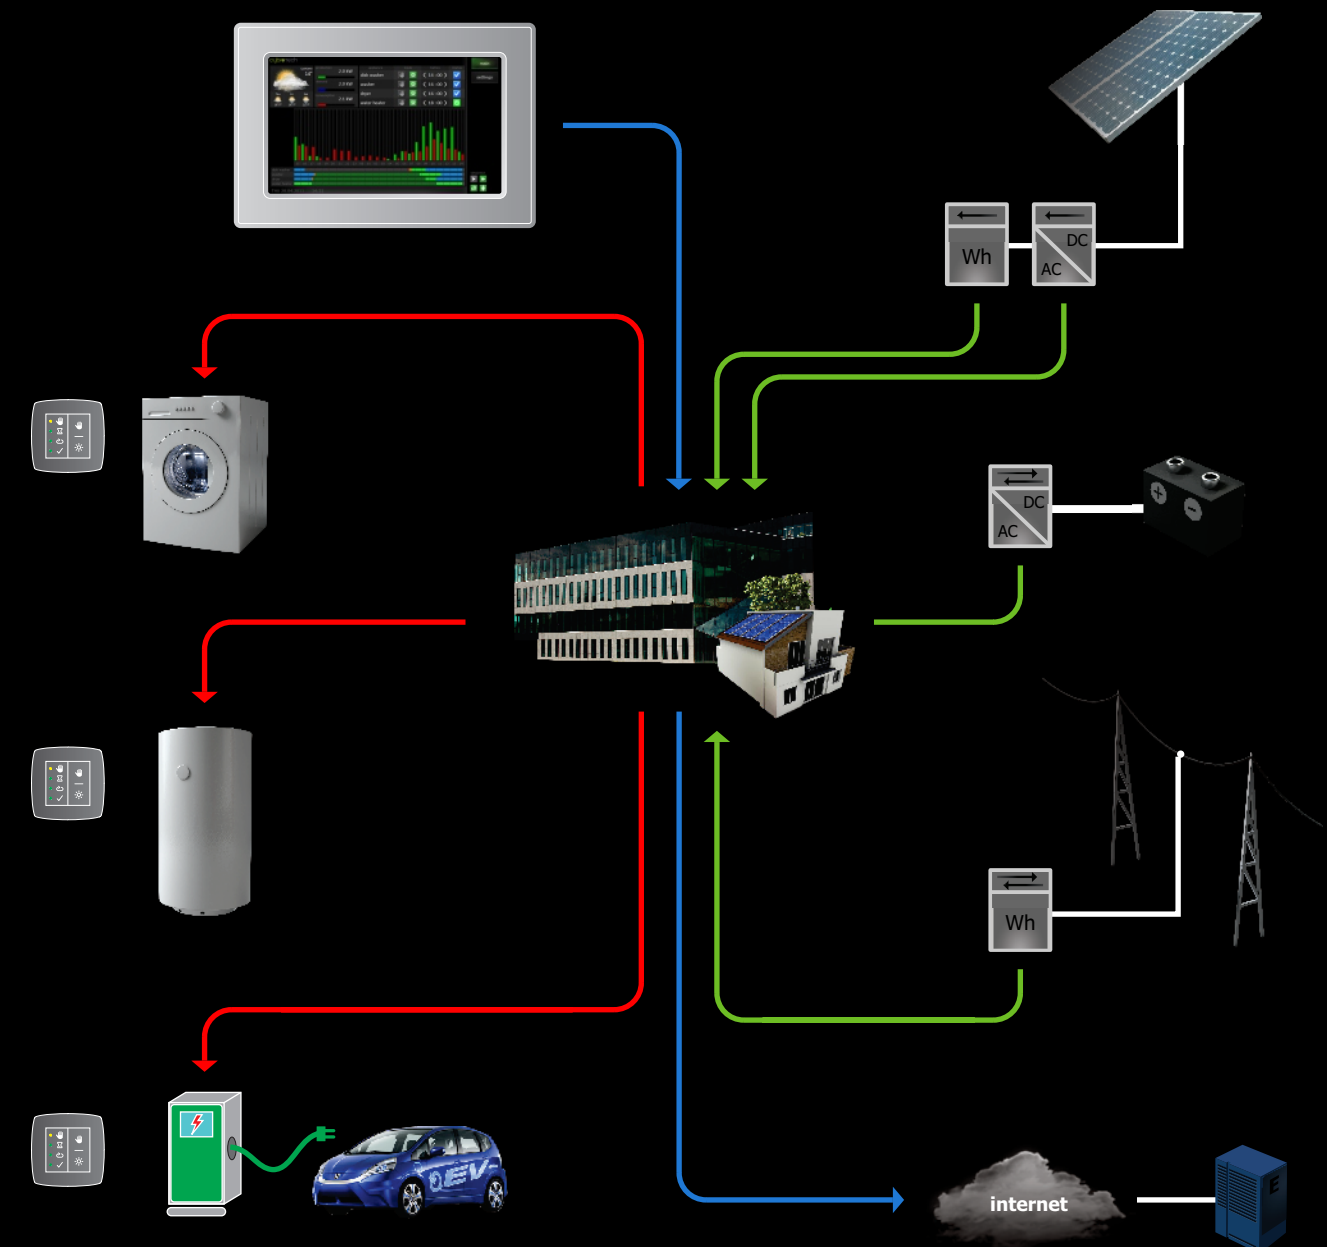

Modular system for monitoring and management of solar power plant

- fast and cost effective start-up of your PV plant after installation
- detailed measurements and statuses on string level
- assure highest possible yield with on-line information
- lower maintenance costs due to complete transparency
- improve ROI by efficient life-time asset management

Sun IQ @ Home

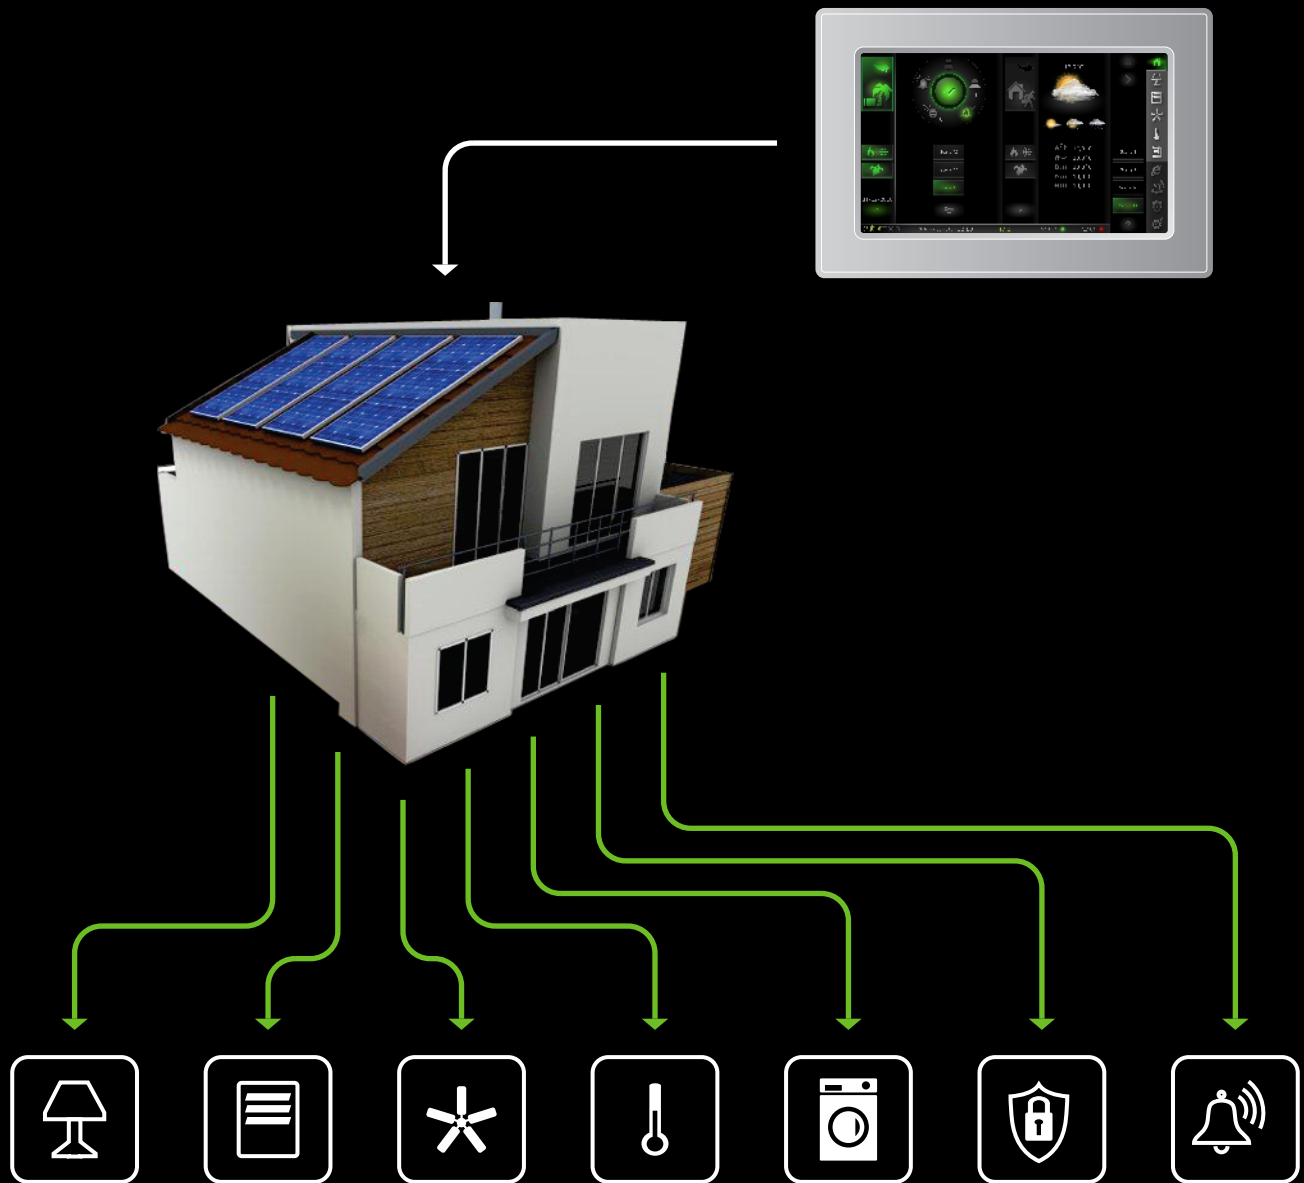

Home energy system - HEMS

- smart control of appliances and buildings
- communication with PV inverter and power meters
- optimization of green energy consumption
- local and central control and configuration
- GUI for complete overview of the operation

Integra IQ @ Home

Smart control for individual home, apartment or residential area

- integration of all electrical devices in a house
- lights, energy, security and much more
- based on industry proven technology and reliability
- fully configurable system, no programming needed
- fully customizable GUI for your comfort
